

Goldeneye Solutions is looking for an experienced or entry-level web developer to work on an exciting and unique project called GOL Network (golnetwork.com).

You're an ideal candidate if you have a strong desire to solve technical problems and you love challenges.

This is a full-time opportunity but part-time is an option for an experienced candidate (3 years+).

REQUIREMENTS

- You've heard of PHP or are an experienced PHP developer.
- You understand HTML/CSS.
- You understand the MVC pattern.
- You've already built a web site or published a web application.
- You have a passion for solving problems.
- You learn quickly.

BONUS (in no particular order)

- You've worked with a PHP framework before (Zend, Code Ignitor, 3+ years experience).
- Experience with a JavaScript toolkit (dojo, jquery, yui).
- Experience with e-commerce and payment processing.
- Experience with SVN (or other revision control).
- You've used PostgreSQL and key-value stores such as Redis, Cassandra or Memcache.
- You've written a PHP extension before (c skills).
- You understand Amazon EC2 or the basics of a cloud based infrastructure.
- Bachelor's degree in Computer Science, Computer Engineering or equivalent.
- Strong oral and written communication skills in French and English.
- You play or have a passion for team sports.

ROLE

- Participate in developing GOL Network: a sports platform that allows teams & players to earn reward points.
- Develop & maintain existing business critical applications in the retail and telecom industry.
- Assist in the troubleshooting and resolution of issues.
- Work with the MV Framework, an innovative PHP & JavaScript framework for developing web based application.
- Work in an agile environment but adhere to software development standards.

COMPENSATION

GDE offers a competitive entry-level salary for a technology startup.

Compensation includes employee incentives depending on your strengths and qualifications.

FAQ

Can I work from home?

It's an option. The culture at Goldeneye is to create an environment where people strive to get things done (complete their mission) and inspire each other. So naturally, working at the office is preferred but for experienced developers, we will trust your judgment to stay home whenever you feel more productive. We expect a minimum of 3 days at the office.

I don't live in Montreal, should I apply?

You're expected to live in Montreal. You'll love it here (if you can survive the winter).

APPLICATION

Please submit your application and resume to jobs@gdesolutions.com

GDE looks forward to meeting you!
